## **Project Announcement – Sensitive US Government Location**

Montgomery, AL - Project Announcement  
Released 6/13/2007 by Norshield

Norshield's VBS Division has been contracted to provide vehicle barrier systems for the sixth sensitive location for the United States Government. This order marks a substantial increase in the number of large government projects for which Norshield has provided vehicle barriers, and is a further increase in activity within the security industry. Norshield continues to strengthen its position with its full line of Vehicle Barrier Systems and services.

While the exact details are not available for release, Norshield is proud to be a part of the DOS family and excited to protect United States interests and lives during our country's critical diplomatic efforts. This order is further evidence of the increased reputation for excellence within the security industry for Norshield and Norshield VBS. The scope of work with the Department of State continues to increase with the substantial volume of Vehicle Barrier Systems provided on DOS projects strengthening the position of Compudyne as single source for critical security products and services.

Norshield VBS expects to do further work on DOS and OBO projects while continuing to expand into other government sectors increasing both the scope of work and the volume of work done by Norshield and Compudyne.

Norshield Security Products is a registered trade name under the company Norment Security Group. Norment Security Group is a subsidiary of Compudyne Corporation. Please see <http://www.go-vbs.com/contact/corporate-contacts/public-safety-justice/> for more information.
