## West Coast Airport Bollards Project Announcement

Project Announcement  
Released 8/22/2007 by Norshield

Norshield Vehicle Barriers has received an order for an undisclosed west coast airport in the United States. This marks the first major airport that Norshield has provided vehicle barriers systems on this year. While doing predominantly Department of State work, this marks another project outside Norshield's primary market. By entering into secondary markets, Norshield's Vehicle Barrier Systems division has already had the best financial year since its creation roughly 3 years ago. Norshield's success stems from its focus on quality products, excellent engineering, and superior customer support.

In other news, Norshield recently attended the FPED VI show (<http://www.fped6.org/>). The show was a positive display of Norshield's portable barrier. Each demonstration displayed the numerous reasons why the NOR90 Ultra Portable Hydraulic Wedge Barrier has no equal. See the Norshield Products page for more information. Norshield was also joined by its partner PevacAmerica (<http://www.pevacamerica.com/>). Norshield displayed their bi-fold Speedgate to great acclaim. The gate expertly infuses fast, smooth operation in a quiet, low maintenance design. The Pevac America Speedgate and Norshield's hardline barriers offer the most complete protect available. Please see Norshield's Gate brochure at <http://www.go-vbs.com/content/gates-brochure.pdf> or contact us for more details on this great product.

In financial news, Compudyne has set the ground work to be acquired by a private investment firm. Please see <http://biz.yahoo.com/bizj/070807/1502522.html?.v=1> for more details. Norshield believes this may strengthen its position in the security industry and specifically allow Norshield and the Norshield VBS division to make a stronger push into numerous markets.

Norshield Security Products is a registered trade name under the company Norment Security Group. Norment Security Group is a subsidiary of Compudyne Corporation. Please see <http://www.go-vbs.com/contact/corporate-contacts/public-safety-justice/> for more information
